

# Medical Power Box

## Top quality power box with ground wire

In a medical setting, a power box must fulfil many conditions both in terms of use and hygiene. The Medical Power Box is setting the new standard. Alongside robust and attractive casing, the power box is equipped with IP44 contact points, earthing points for ground wire and a seamlessly moulded power cable. The impact of moisture and dust has been kept to a minimum with the Medical Power Box.

Robust casing in polyacetal with high breakdown voltage

2E Medical Power Cable

### Advantages for you

- IP44-contact points
- 2E Medical Power Cable
- Robust casing
- Fixed control light
- Various installation options

Top quality IP44 contact points angled at 45° with protective cover
